

## **Water Education Schools Outreach Programmes**

In liaison with various stakeholders, DWAF, DAEA, District and Local Municipalities, Environmental Health, Environmental Education Service uses locally designed materials and adopts an educational approach to highlighting important water and environmental issues at schools

This is done through coordinating various activities including:

- Adopt a School Programmes and school awareness programmes
- Educator workshops
- Environmental days' campaigns e.g. Water Week, Wetlands Day, World Water Monitoring Day, Weed-Buster week etc.)
- Water Quality testing at nearby streams and rivers
- Water Quantity audits at schools
- Supporting greening and Eco-schools projects
- Environmental Education Holiday Programmes for learners and Educators
- Learner competitions e.g. speech contest, debates and symposia on environmental sustainability
- Developing educational materials
